The job market meets students & graduates of Politecnico di Milano
CareerService
The job market meets students & graduates of Politecnico di Milano

For employers
CareerService connects students and graduates from Politecnico di Milano with the job market. This brochure is meant to allow you to learn more about us and how we bring value and results to meet the changing needs of employers, candidates and the academic world. We believe in the value of partnerships with direct employers to achieve the best outcomes for all parties involved. We focus on continuous improvement and innovation in our services. Internationalization is key: we work to expand our network with employers and other career centers on a global level. I hope we will have the opportunity to work with you and welcome you on campus at Politecnico di Milano in the future.

2011 - We launched an International Division which liaises with foreign employers.

2012 - We are present on Social Media with a Facebook page aimed at fostering fast communication with students and a LinkedIn company page used to expand our network and constant exchange with HR professionals.

We are a team of passionate people with expertise in employer branding, graduate recruitment, event organization, labor regulations, communication, social media, sales & marketing.
We believe that the reputation of a company as an employer must be built within the university context to invest on young talent. This is especially true when it comes to hiring profiles for which there is large demand on the job market, such as engineers, designers and architects.

We attempt to provide Polimi students with a sincere picture of the job market by creating a direct channel of communication between the university and the employers.

Thanks to CareerService, employers hire students and graduates on campus and recruit talent from Polimi. Thanks to CareerService, students and graduates find their next employers.
We listen, give advice, then let the employers speak. We reach out to new employers on a daily basis and focus on their needs to help them understand the university context, identify goals and potential candidates. Thanks to our consultancy, the employers themselves then come on campus to recruit and to help students and graduates discover sectors, profiles and career paths, learn how to write a good CV, prepare for interviews, improve job search and networking skills, etc. The result for the company is successful recruitment and the benefit of an active talent pipeline. For students the result is access to many opportunities along with events and resources that increase their awareness of the job market.

CareerService

Welcome  |  Mission  |  Why employers choose us  |  What we offer  |  Partners  |  Contact us

Career Service is an efficient trait d’union between Companies and students, by offering good solutions for Employer Branding and Recruiting needs.

Cristina Cricca, Recruiting Coordinator - McKinsey

The professionalism, availability and focused approach of the Career Service provides several valuable opportunities for students and companies to know each other better.

Gioia Ferrario, Recruiting Director - BCG

In 2013, EADS and its four Divisions (Airbus, Astrium, Cassidian and Eurocopter) have built a strong partnership with Politecnico di Milano for employer branding and recruitment purposes. We particularly appreciate the flexibility and support of the Career Service representatives throughout the year.

Sophie Corlay, Employment Marketing - EADS
