Methods for enrolling in laurea magistrale (equivalent to Master of Science) programmes

Academic Year
2016/2017
All students are required to know the provisions that regulate the university career.

Any changes that will come into force after the publication of this guide will be announced:

- in the notice section on [www.polimi.it/en/students/noticeboard](http://www.polimi.it/en/students/noticeboard) where you find the teaching and Registrar’s Office notices
- in the Web mailbox available at Online Services ([www.polimi.it/onlineservices](http://www.polimi.it/onlineservices))
  (in particular this last tool is used as institutional channel of communication with students)

The information included in the guides and sent through the above mentioned Online tools can be seen as official notice to the parties concerned.
Request for assessment for admission to laurea magistrale (equivalent to Master of Science) programmes

Students can be admitted to Laurea Magistrale (equivalent to Master of Science) programmes at Politecnico di Milano in both the first and the second semester.

Entry to laurea magistrale (equivalent to Master of Science) programmes is subject to an evaluation of the past career of applicants, and to verification of their knowledge of English.

The selection methods privilege students with greater skills and personal preparation, no matter what School or University they come from.

The entry conditions can be different for each laurea magistrale (equivalent to Master of Science) programme.

All the internal and external applicants must find out if they have to do an entrance test for their specific programme; to do this they should consult the site of the reference school (www.polimi.it/en → university → schools) where the execution dates and methods are published.

Each School can deliberate on specific criteria for each programme, therefore the student is invited to consult the School site and the teaching regulations of the programme to be attended.

When to present the application

</table>
• If you have presented a request for assessment in the first semester and received a positive assessment but have not yet enrolled, you are obliged to present the request for admission again in the second semester.

• If you have enrolled in a laurea magistrale (equivalent to Master of Science) programme at another University and want to transfer to Politecnico di Milano, follow the same admission methods for those who intend taking a Laurea magistrale (equivalent to Master of Science) programme for the first time.
Requirements for presenting the request for assessment

Qualification

Students can present their request for assessment for admission to Laurea magistrale (equivalent to Master of Science) programmes only if they have a First level Degree (Min.Decree 509/99 or Min.Decree 270/04), a Degree obtained with the educational system used prior to Min.Decree 509/99 or University Diploma.

A request for assessment can also be presented if you are a student:
- of Politecnico di Milano and you have enrolled in the Degree exam session
- of another University and will graduate before your enrolment in the Laurea magistrale (equivalent to Master of Science).

In all cases of positive assessment, you must have obtained your degree before the enrolment deadline date in order to proceed with registration.

Knowledge of English

Remember that to attend the Laurea magistrale (equivalent to Master of Science) programmes, it is mandatory that students demonstrate that their knowledge of the English language is at the level indicated in table 1.

If this requirement is not satisfied by the presentation of an English language certificate, students cannot enrol.

You must present the original English language certificates requested by the University for the following programmes:

- Architecture Urban Planning construction Engineering (AUIC): within the date given for presenting your request for admission
- Design: within the date given for presenting your request for admission
- School of Civil, Environmental and Land Management Engineering (INGCAT): within the date indicated for enrolment

School of Industrial and Information Engineering: within the date indicated for enrolment

If you need further information, we suggest consulting the programme teaching regulations on the site of the School you are interested in (www.polimi.it/en → university → schools)

N and V assessment criteria for students who graduated at the Politecnico

Those students who graduated from Politecnico di Milano and present a request for admission will obtain a positive assessment if:

a. their N (credits acquired) and V (weighted average) parameters, at the end of the 2nd year September exam sessions, correspond to the values deliberated by the Schools.

Students can verify the N and V parameter values, which are set by the Schools according to specific criteria, by accessing the Online Services (www.polimi.it/onlineservices in the section “Career”).

In some cases, for example career with programme changes, the N and V parameters are not available. In these cases, the School will make a specific assessment, which can include a specific ranking.

b. they satisfy the English language requirements requested by the teaching Regulations of their programme (www.polimi.it/en/students/guidelines-and-rules).

c. they have graduated within four academic years from enrolment1

---

1 An assessment of graduation from a first level laurea (equivalent to Bachelor of Science) in less than four academic years from registration considers the total of academic years over which the academic curriculum is spread. The academic curriculum closes when all 180 ECTS credits of the first level Laurea (equivalent to Bachelor of Science) have been obtained, including the end test, the English language exam and, where required, completion of curricular internships.

Note that presenting a Study plan with the aim of recovering missing attendance or attendance as extra for Laurea magistrale (equivalent to Master of Science) programmes factually increases the duration of the academic year. For example, the Degree exam session of February 2017 is considered as the last of Academic Year 2016/16 for those students who have not presented a new Study plan for Academic Year 2015/16 (because not required to recover missing attendance and/or not interested in inserting, as extra, attendance at Laurea magistrale (equivalent to Master of Science) programmes), while it is considered as the first degree exam session of Academic Year 2016/17 for those students who
d. they enrol in a continuation programme to a Laurea magistrale (equivalent to Master of Science) after their first level programme.

The above students must present a request for assessment.

To access the Laurea magistrale (equivalent to Master of Science) programmes, students who do not have the required N and V parameter values, who did not graduate within 4 years from registration, and those who come from other Universities are subject to prior career assessment by the School Boards or Study programme board, which give an incontestable judgement. The Boards must give a suitable reason for their decision to exclude a student, whenever this occurs.

The individual Teaching regulations for Programmes (www.polimi.it/en → programmes → Course Catalogue → Laurea (equivalent to Bachelor of Science) and Laurea magistrale (equivalent to Master of Science)) establish any additional curricular requirements necessary for admittance to the Laurea magistrale (equivalent to Master of Science) programmes.

For each Laurea magistrale (equivalent to Master of Science) programme, the Teaching regulations indicate the criteria to be followed for granting or refusing admission.

These criteria must include one or more of the following items:

a. the laurea (equivalent to Bachelor of Science) score, or the weighted average over the whole career already covered, with a minimum of 150 ECTS credits; in this case sub condicione admission can be deliberated, on the condition that the student presents self-certification of graduation within the indicated time deadlines

b. the number of years taken to graduate (e.g. within the 4th academic year from registration, i.e. within the February after the 4th calendar year has passed from registration)

c. the minimum number of credits acquired in specific sets of Disciplinary Scientific Sectors - SSD (if possible, indicate the ‘equivalences’ with SSDs that do not belong to Architecture/Design/Engineering classes)

d. assessment of the skills acquired even through a curriculum / motivation letter / references / possible interview / certification of relevant working experience (the documentation relative to this experience could, for example, allow the CCS Board to derogate from the limit on the years taken to graduate).
How to present a request for assessment

Assessment request through the Online Services

To present a request for assessment, students must:

- access the Online Services ([www.polimi.it/onlineservices](http://www.polimi.it/onlineservices)) using their person code and password, and select “Admission to the Laurea magistrale (equivalent to Master of Science): application presentation, result consultation and registration” then select the programmes they want to have assessed. **They can indicate up to three preferences.**

If you have not already enrolled at the Politecnico di Milano site, you must register with the Online Services by selecting "Enrol".

**The preferences made can be modified once only.**

Documentation

Students can use the "upload" option from "Admission to the Laurea magistrale (equivalent to Master of Science)”: request presentation, result consultation and registration” application to upload the required documents.

Please verify the specific indications of each School and Programme ([www.polimi.it/en → university → schools](http://www.polimi.it/en)).

If you did not graduate from Politecnico di Milano and you want to present the request for admission to a Laurea magistrale (equivalent to Master of Science), refer to what is indicated for each School regarding the presentation of documents; this information can be found on the next page.

In some cases, even Politecnico di Milano graduate students may have to present their documents online for assessment on the basis of the degree programme of provenance and the Laurea magistrale (equivalent to Master of Science) programme for which the request for admission is being presented.

All students must present the original version of their English language certificate to the Registrar’s Office of the Programme reference campus.

**SCHOOL OF CIVIL, ENVIRONMENTAL AND LAND MANAGEMENT ENGINEERING (INGCAT)**

**SCHOOL OF INDUSTRIAL AND INFORMATION ENGINEERING:**

If you want to enrol in an Engineering programme and you are not a Politecnico di Milano graduate, you must upload and supply the following documents to request admission:

- self-certification of your Laurea (equivalent to Bachelor of Science). If you are a graduating student, you can self-certify your presumed graduation date
- self-certification of the exams taken and the teaching programmes. In the case of the Laurea magistrale (equivalent to Master of Science) in Management, Economics and Industrial Engineering, you can present self-certification of the exams with the indication of the pertinent Disciplinary Scientific Sectors (SSD) instead of the programmes
- You can self-certify your knowledge of English at the level required for admission and, if required, you can upload the certificate if already in your possession. If you still do not have your certificate, you can continue inserting the request for assessment by selecting 'Next'.
Remember that the original English language certificate must reach the Registrar's Office within the date indicated for registration.

For more information on the documents and/or additional elements for assessment, consult the Educational regulations for Academic Year 2016/2017 on the School sites www.polimi.it/en → programmes → schools

- School of Civil, Environmental and Land Management Engineering: www.ingcat.polimi.it/en
- School of Industrial and Information Engineering www.ingindinf.polimi.it/en

ARCHITECTURE URBAN PLANNING CONSTRUCTION ENGINEERING (AUIC/ING)

If you want to enrol in an Engineering programme and you are not a Politecnico di Milano graduate, you must upload and supply the following documents to request admission:

- self-certification of your Laurea (equivalent to Bachelor of Science). If you are a graduating student, you can self-certify your presumed graduation date
- self-certification of the exams taken
- other certification relative to other university qualifications: Master, Doctorate, Post-graduate programmes
- You can self-certify your knowledge of English at the level required for admission and, if required, you can upload the certificate if already in your possession. If you still do not have your certificate, you can continue inserting the request for assessment by selecting 'Next'. Remember that the original English language certificate must reach the Registrar's Office within the date indicated for registration.

For more information on the documents and/or additional elements for assessment, consult the Educational regulations for Academic Year 2016/2017 on the site of the School of Architecture Urban Planning Construction Engineering www.auic.polimi.it → choose the English version

AUIC/ARCH SCHOOL

If you want to enrol in an Architecture programme that is part of the School of Architecture Urban Planning Construction Engineering you must upload and supply the following documents:

- only for graduate students at other Universities self-certification of the qualification obtained and the exams passed with at least 145 ECTS credits. If you are a graduating student, self-certification of your presumed graduation date
- other certification relative to other university qualifications: Master, Doctorate, Post-graduate programmes
- a Portfolio
- Curriculum Vitae
- motivational letter
- You can self-certify your knowledge of English at the level required for admission and, if required, you can upload the certificate if already in your possession. If you still do not have your certificate, you can continue inserting the request for assessment by selecting 'Next'. Remember that the original English language certificate must reach the Registrar's Office within the date indicated for registration.

For more information on the documents and/or additional elements for assessment, consult the Educational regulations for Academic Year 2016/2017 on the site of the School of Architecture Urban Planning Construction Engineering www.auic.polimi.it → choose the English version
SCHOOL OF DESIGN

If you want to enrol in a School of Design programme, you must upload and supply the following document to request admission:

- motivational letter (a single document indicating the reasons why the applicant wants to follow a Laurea magistrale (equivalent to Master of Science) programme)
- curriculum
- a project Portfolio (or thesis abstract if the applicant comes from a non-Project school)
- self-certification with Laurea (equivalent to Bachelor of Science) score or exam average for graduating students and self-certification of the exams taken and the scores obtained for each subject (only for students coming from a different University).

You can self-certify your knowledge of English at the level required for admission and, if required, you can upload the certificate if already in your possession.

If you still do not have your certificate, you can continue inserting the request for assessment by selecting 'Next'. Remember that the original English language certificate must reach the Registrar's Office within the date indicated for registration.

The documents must be duplicated for all the expressed options.

For more information on the Portfolio and documents and/or additional elements for assessment, consult the "Guide to Admission to Laurea magistrale (equivalent to Master of Science) programmes (regulation 270/40) for the School of Design, A.Y. 2016/2017" on the School site (www.design.polimi.it)

Should an assessment request be made for several programmes, even if part of the same School, the relative documents may have to be produced for each request presented.

Students with Italian citizenship who have a foreign qualification must have it translated, legalised and present it with a certificate of equivalence of qualification as established by the circular letter from the Ministry of Education, Universities and Research together with the programme

www.miur.it
www.studiare-in-italia.it/studentistranieri/testo_delle_norme.html
**Special points for foreign students**

Students with foreign qualifications should follow the pre-enrolment process described on the Polinternational site (www.polinternational.polimi.it) and must adhere to the indicated deadlines. In this way they can apply for merit scholarships and obtain more information on how their stay in Italy will be organised in the phase after admission.

</tr>
</tbody>
</table>

*In addition to being schooled for at least 12 years and only in Countries in which the university system does not include the 3 years + 2 system.

Students can see the result of the assessment on their personal page on the Online Services (www.polimi.it/onlineservices).
If the assessment is positive, contact the Italian diplomatic representatives to obtain the documents needed for enrolling and for the visa issue process for non-European students who live abroad.

**Students who have foreign qualifications, evaluated positively for admission to a Laurea magistrale (equivalent to Master of Science) programme, must pay € 185.58 within the date set on the basis of the entry semester, and available on www.polinternational.polimi.it to confirm their admission.**

This amount will be deducted from the second instalment of the university tuition fees. Applicants who for any reason or problem (e.g. visa not issued) decide not to enrol at Politecnica di Milano, will not receive any refund.
Programmes offered and places available

For Academic Year 2016/2017, Politecnico di Milano has decided to hold the following Laurea magistrale (equivalent to Master of Science) programmes.

### School of Architecture, Town Planning and Building Engineering

Results of the request for assessment

The results of all students are not published at the same time. Some Boards, in fact, publish the results of all students at the same time, at the end of the assessment period, while others make them visible as soon as the application has been assessed. As the Boards that assess vary for each Laurea magistrale (equivalent to Master of Science) programme, some students may see the result before others.

Consulting the results

Students can consult their results and admission conditions through the application used to present the request for assessment.

The assessment status of each Laurea magistrale (equivalent to Master of Science) programme for which assessment was requested appears with a coloured ball beside it.
Possible assessment results

Each Board evaluates the requests, associating one of the following results (visible to the applicants) to each one:

Preference Statuses

- **Da valutare**
  Preference to be assessed. - (the applicant cannot enrol)

- **Da formalizzare**
  The admitted candidate accepts the admission

- **In Sospeso**
  The board notifies the Candidate that it has considered his/her application, but that it does not have sufficient elements to express a final assessment; the candidate may be asked to provide further elements to integrate the application he/she has submitted.

- **Valutata positivamente**
  Choice formalized ready to be enrolled

Some applicants can be admitted with teaching obligations/bans:

- **Obligations** are courses that are necessarily inserted in the student's Study plan; the course exams still have to be passed.

The Board can delay the obligation to attend a programme until the following year.

The obligation is calculated for ECTS credits that are useful for obtaining a Laurea (equivalent to Bachelor of Science).

Selecting specific courses that are **banned**, defined in detail, can never be inserted in the Study plan.

- **Valutata positivamente con vincoli**
  Admitted with Curriculum Integrations for Individual Courses only.

admission is subject to the fact that the applicant, within the academic year to which the application refers, obtains the ECTS credits relative to the curricular integrations, indicated by the Board in terms of quantity, with the relative identification codes, therefore the applicant must take additional exams before enrolling.

- **Utilizzata per l'immatricolazione**
  Candidate enrolled

- **Utilizzata per l'immatricolazione con vincoli**
  Individual Course enrolment with Curriculum Integrations.

- **Valutata negativamente**
  Preference assessed negatively

- **Rifiutata dal candidato**
  Preference discarded on matriculation.

- **Invalidata per iscrizione effettuata**
  Preference cancelled due to matriculation.

- **Valutazione modificata**
  Choice modified
We remind you that after enrolment, you will have to submit a Study plan, and you might already notice as inserted:

- **attendance endorsements**: relating to extra courses inserted in the latest Study Plan submitted for the three-year **not passed/taken** programs. Attendance endorsements of Single Programmes, too, may be requested.

- **exam endorsements**: relating to extra courses inserted in the latest Study plan submitted for the three-year **passed/taken and/or anticipated as Single Programmes**

- **additional academic requirements**: courses inserted in the Study plan passing which is compulsory. The Commission may approve and/or postpone attendance of a course to the following year; the requirement is calculated in the total of 120 university credits useful for graduation. Attendance may refer both to the current and to the following year.

In drawing up the Plan, moreover, you must pay regard to any Bans allocated by the Commission at the stage of assessing the request for admission to the laurea magistrale (equivalent to Master of Science) course

- **bans**: relating to exams the candidate may not insert in the Study Plan.

By clicking on the icon with the magnifying glass, you will be able to view in detail the outcome of the application for admission, further ascertaining in the process how the Commission has viewed the anticipated exams as “extra” or as “single programme”.
Registration

Methods for enrolling

If you are among the students who received an assessment that permits registration, you should use the Online Services (www.polimi.it/onlineservices) to access the application where you saw the result. After selecting the icon with the magnifying glass, click the “enrol” button and choose the payment method:

Warning: the amount of tuition fees varies according to the registration semester:
- in the first semester the amount is € 845.58
- in the second it is € 439.58

You can pay:
- **Online with a Credit Card or Prepaid card** (as long as it is part of the Visa – Mastercard – American Express circuit), always accessing from the page where you saw the results of the application (in this case the payment code will be inserted automatically), after which you can continue completing the required fields and, at the end of the procedure, you should print the receipt.
- **At any Banca Popolare di Sondrio branch** (www.popso.it) and **any Banca di Piacenza branch** (www.bancadipiacenza.it), using the payment form that you can download from the application. After paying, you will be given a payment code which you should insert in the application to complete your registration. You can then continue by filling in the required fields. When finished, you should print the receipt.

**Use one of these types of payment method; do NOT download the MAV payment slip from the Online Services associated with a previous career at Politecnico di Milano**

### Deadlines

#### Registration period

<table>
<thead>
<tr>
<th>Course</th>
<th>I semester</th>
<th>II semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUIC/Arch</td>
<td>From 21 to 26 September 2016</td>
<td>From 22 February to 1 March 2017</td>
</tr>

</tbody>
</table>
After these deadlines, the application and payment methods will no longer be available and you will not be able to enrol.

After enrolling for semester I of a Laurea magistrale (equivalent to Master of Science), those students who intend withdrawing from their studies within 30/11/2016 and those who enrolled for semester II within 02/05/2017, can have their first instalment reimbursed, using the relative form available on: www.polimi.it/en/students/forms/

Reimbursement does not include the administrative fee of € 45.58.

**Reimbursement does not include the enrolment fees of €254.00 if enrolment certificates were requested and used.**

In the period between graduation and enrolment in a Laurea magistrale (equivalent to Master of Science), students cannot take exams because not classed as Politecnico di Milano students during that period.
Enrolment in individual programmes to obtain curricular integrations

If curricular integrations are assigned, students cannot enrol in a Laurea magistrale (equivalent to Master of Science) programme, but will have to take the additional exams. To attend and and take them, students should enrol in the individual courses (Single subject programme) using the application in which the result of the request for assessment is published.

You can enrol in a maximum number of single subject programmes equal to 80 ECTS credits per year, which can include:

- either the curricular integrations, assigned by the Board during assessment for admission to a Laurea magistrale (equivalent to Master of Science)
- or the advanced courses of the Laurea magistrale (equivalent to Master of Science) programme from among those indicated in the educational regulations of the programme; remember that the latter cannot in any event exceed 32 ECTS credits per year.

Attention: those who enrol in single subject programmes with curricular integration must present a request for assessment again.

The terms for enrolment in single subject programmes with curricular integrations are the same as those for enrolment in Laurea magistrale (equivalent to Master of Science) programmes.

The amount payable for tuition fees and contributions is as follows:

- 1st instalment **€ 845.58**
- 2nd instalment varies according to the credit total:

<table>
<thead>
<tr>
<th>ECTS CREDITS</th>
<th>I INSTALMENT</th>
<th>II INSTALMENT</th>
<th>TOTAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 30</td>
<td>→ 845.58</td>

<tr>
<td>Over 30 and up to 45</td>
<td>845.58</td>
<td>344.50</td>
<td>1,190.08</td>
</tr>
<tr>
<td>Over 45 and up to 74</td>
<td>845.58</td>
<td>689.00</td>
<td>1,534.58</td>
</tr>
<tr>
<td>Over 74 and up to 80</td>
<td>845.58</td>
<td>1,102.40</td>
<td>1,947.98</td>
</tr>
</tbody>
</table>

The number of ECTS credits relative to curricular integrations is not included in the 120 ECTS credits necessary for obtaining a Laura magistrale (equivalent to Master of Science).
Changes and transfers

✓ Coming from Laurea Specialistica/Magistrale (equivalent to second cycle/Master of Science) programmes from other universities
✓ Coming from Laurea Specialistica/Magistrale (equivalent to second cycle degree/Master of Science) programmes from other universities
✓ Coming from programmes indicated in Min.Decree 509/99.

Students who have already enrolled in a Laurea Specialistica/Magistrale, and who intend requesting a change of Programme or School, or to be transferred from another University, must have the same requirements and respect the same deadlines given for presenting the request for assessment and enrolment, which appear in the previous sections.

Attention: Changes and transfers cannot be made in the second semester.

Students from other Universities must acquire at least 60 credits at the Politecnico, equivalent to one year of attendance.

Schools can determine other obligations if necessary, so we advise checking the respective sites. In particular, the School of Design offers a pre-assessment service for requests sent to the School itself (www.design.polimi.it – English version)

Steps to take after enrolment

Study plan

Presenting your study plan

After enrolling, students must present their yearly Study plan within the periods indicated by the academic calendar using the Online Services, indicating the programmes to be taken (www.polimi.it → programmes → calendar-lectures-exams).

The Study Plan remains valid for one year.

Modifications can be made with the School of Engineering and the School of Architecture and Society, but only during the interval indicated by the Academic Calendar, and only to the attendance required for the second semester of the same academic year.

The Study plan must consider all the obligations deliberated by the Board and cannot exceed 80 ECTS credits per year. More specifically:
- Any teaching obligations associated with the context academic year will be calculated in the total of the credits required for the year and for the purpose of acquiring the qualification.
- Any exam validations should be translated into Plan lines that record acquisition (for validation) of the ECTS credits associated with programmes offered during the selected Laurea magistrale (equivalent to Master of Science) programme.
- Any attendance validations that allow entry to an exam during the first available session, will be calculated in the total of yearly credits.
- Possible bans

In all cases, students must follow the regulations for verification of their knowledge of English (consult the Guide to the English language (www.polimi.it/en/students/guidelines-and-rules) for more information and the entrance prerequisites necessary for enrolling in the same programme in Academic Year 2015/2016 (consult educational rules of the specific School).
Attendances made are not lost, but remain acquired, and they do not have to be re-inserted year by year.

A maximum number of 80 and a minimum number of 32 ECTS credits can be selected for the academic year.

If a Study plan is not presented within the given deadlines, € 100.00 will be added for arrears to payment of the second instalment.

Publication of Architecture and Design programmes
School of Architecture, Town Planning and Building Engineering and School of Design

Previously Approved Study Plans (PSPA) are available for some Laurea magistrale (equivalent to Master of Science) studies; these plans divide the laboratories that the students have to select when presenting their Study plan in order of preference.

Students will be allocated to one of the selected options according to how the teaching load is distributed among the professors. The Schools will indicate the availability of places for each programme. Students are allocated according to criteria established by the Regulations of each School.

Policard (Ateneo +)

The Policard will be sent to your registered address; with this card you can use the Politecnico di Milano services (access to the computerised classrooms and the reading room, payment of tuition fees and contributions, have refunds credited, etc.).

While waiting for your Policard, you can use the Libraries by presenting the surveillance staff with the enrolment receipt together with an identity document or an attendance certificate.

Your Policard must be enabled before it can be used; to do this access the pertinent function on the Online Services (www.polimi.it/online services → Data → Policard Card - activation, status display, booking re-issue).

This operation should only be carried out once, before the card is used.

The Policard (Ateneo +) can be used:
- as a "university card" to access the Politecnico spaces such as laboratories, libraries, classrooms, canteen, reserved areas, conventions and events, and services such as the logical access to the Internet or the online services that can be used by Politecnico di Milano students.
- as a "prepaid card rechargeable with IBAN" to have any refunds and the benefits issued by Politecnico di Milano for the right to study credited. As a Card it can be used to make payments or withdrawals in Italy and abroad, as well as to carry out some typical current account operations: credit bank transfers, issue bank transfers and pay your consumption. To activate it, take an identity card or tax code or passport personally to any branch of the Banca Popolare di Sondrio. No amount will be charged for this operation. Further details can be seen on the page of the Banca Popolare di Sondrio, under Carta ateneo + (www.popso.it/ateneopiu)
- as a "contactless payment card" to make small purchases in the stores that install this new system.

The Policard (Carta Ateneo +) does not have a photograph and is not valid as an identity document or as a document to prove enrolment at Politecnico di Milano.

As a result, students must always present a valid identity document at the exam premises.
**Lecture times**

A few days before lectures begin, you can verify the time of your lessons, the time and classroom in which you can attend the courses selected in your Study plan through the Online Service → lecture times.

**ISEE (Equivalent Economic Situation Indicator)**

The new ISEE (Presidential and Council of Ministers Decree of 03 December 2013) came into force on 1 January 2015.

Students who wish to be assigned to a lower income bracket than the maximum income range (10) must present an ISEE Certificate 2017 (Equivalent Economic Situation Indicator) used for obtaining the services provided under the "Right to Higher Education" regulations. This certificate will determine the amount due for the second instalment.

All deadlines relative to Academic Year 2016/2017 will be published in the calendar on page www.polimi.it/en/programmes/calendar-lessons-exams/academic-calendar

The new ISEE (Equivalent Economic Situation Indicator) indicator is only issued by the INPS (Social Security Service).

The DSU (Self-Declaration) to obtain ISEE certification can be presented, as indicated by new legislations:

- Independently, by connecting with the INPS site (www.inps.it), and independently inserting your information in a pertinent section (https://servizi2.inps.it/servizi/Iseeriforma/home.aspx)
- Competent INPS offices for the area
- Tax assistance centres
- Municipalities

The ISEE information should be inserted in your personal page on the Online Services (www.polimi.it/onlineservices → university tuition fees)

**Tuition fees and contributions**

The first instalment of the first year should be paid when the student enrols. The second rate must be paid within 22 May 2017 and is calculated on the basis of:

- the **number of ECTS credits** in the Study plan
- the **income bracket declared** on the ISEE declaration
**Alta Scuola Politecnica (ASP)**

The Alta Scuola Politecnica (ASP), which was started in 2004 by Politecnica di Milano and Politecnica di Torino, runs parallel to the laurea magistrale (equivalent to Master of Science). It is centred on interdisciplinary training and on the realisation of multidisciplinary projects.

150 students are selected for each ASP programme, from among architects, designers and engineers. 25% of those chosen are foreign students, while 50-60% come from the top first level Graduate students from the two Politecnicos. The remainder are selected from the best 1st level Graduate students from other Italian universities.

To apply, students must have an average of above 27/30 (and, in the case of students from both Universities, be part of the top 7.5% of the students of each Laurea (equivalent to Bachelor of Science) programme, have an optimal knowledge of English and suitable motivation, verified by an ad hoc interview that is part of the selection process.

To add continuity to the ASP experience, even after the end of the two-year experience, the graduate students established the "ASP Alumni" association.

The educational road is based on interdisciplinary programmes and multidisciplinary projects. The official language is English.

ASP programmes are typically articulated as Winter, Spring and Summer School lasting one week, and they are held in various Italian localities.

The objective of ASP projects is to experiment with both the specific knowledge acquired during Lauree Magistrali (equivalent to Master of Science) programmes, and the transversal knowledge obtained during ASP courses, on themes tied to interdisciplinarity in innovation and in particular the development of complex systems in multidisciplinary contexts.

Additional information on the ASP programme, the disciplinary projects selected for the first nine programmes, the admission criteria and the methods of application can be found on [www.asp-poli.it](http://www.asp-poli.it).
On-line Services

The Online Services (www.polimi.it/onlineservices) can only be used by registered users who have their access credentials (person code and password).

Through the Online Services you can start all administrative procedures, see and modify the data, carry out and conclude the University entrance procedures, your career, your studies. The range of services varies according to the profile of each individual student and the permitted operations are those made available by the particular administrative and teaching position.

Registering for the Online Services

To obtain a person code and password, you must register by connecting to the www.polimi.it/onlineservices page and selecting “New User? Register”.
Pay attention to the fields to be compiled: in particular the obligatory data and the personal email address to which a message will be sent for validation. The inserted email address is necessary for recovering the password when and if necessary.
After registering, you will be asked to give a password. Finally, you will be issued with your person code (we recommend clicking on "print" and keeping the registration receipt).
A mail message useful for completing the registration procedure will then be sent to your personal email; the message also contains your person code as a reminder.
Click on the link in the email message to validate the supplied email address.

At this point you can identify yourself by inserting the person code and password, and use the Online Services to:

- access the TOL registration service (whenever you want to register for a TOL, if this has to be done several times)
- consult the result of the Test/Tests that was/were taken
- access all the other Online Services

Recovering password or Person code

If you have to recover your password, go to the Online Services (www.polimi.it/onlineservices), select ‘Credentials recovery’, then submit the personal email address entered during the registration phase and click on "confirm".
The system will send an email to the personal email address, and clicking on the link in the message will make the display for setting a new password appear.

If you have lost the data required for recovering a password, you can contact the pertinent Registrar’s Office directly (listed on the "useful addresses" page at the end of this guide), either personally or through another person with an identity document, a signed delegation and a copy of the document of the delegating student.
Alternatively, you can go to the Online Services (www.polimi.it/servizionline → credentials recovery), download the "request form" and send it, compiled, together with the scan of an identity document, to codicepersona@polimi.it
Electronic mail: Webmail service

Politecnico di Milano, with the intention of guaranteeing speed and efficiency for communication among students and institutional interlocutors (Professors, Schools, Secretaries), assigns an institutional email mailbox to each enrolled person. Other email addresses will not be used by Politecnico to communicate with students. The email can be directed to your personal email using the Online Services function on www.polimi.it/onlineservices and selecting "email management".

All the deadlines for Academic Year 2016/2017 will be published in the calendar on www.polimi.it/en/programmes/calendar-lessons-exams/academic-calendar

More information and details are published on the www.poliorientami.polimi.it site or on www.polimi.it/en/students
Registrar’s Offices

You can turn to the Registrar's Office for all procedures relative to enrolment and the administrative management of students’ careers.

There is a Registrar’s Office in each University campus, and which deals with:

- Registering for the entrance test
- Enrolments in Laurea triennale (equivalent to Bachelor of Science), Laura magistrale (equivalent to Master of Science) and single subject programmes
- OFA (Additional Educational Obligations) Completion
- Enrolment in subsequent course years (Min.Decree 270/04, Min.Decree 509/99 and previous)
- Administrative position management (withdrawal, worsening scores, suspension)
- Programme transfers/changes (excluding evaluation of the previous career, which is transferred by the Schools to referring professors)
- University career until graduation
- Management of tuition fees, exemptions and refunds
- Certificates with revenue stamps

The premises and public opening hours of the Registrar’s Offices can be consulted on: www.polimi.it/en → students → contacts and faqs → Registrar's Office

The Registrar's Offices remain closed from 15 to 19 August 2016.

Contacts

Reserved and personal information, relative to the administrative aspects of careers, can only be supplied in manners that respect the privacy of the student and, more precisely:

In the case of missing authentication, the Registrar’s office can only issue general information pursuant to Legislative Decree no. 196 of 30 June 2003 "Code regarding the protection of personal data". Correspondence sent to the Milan campuses must be addressed to Piazza Leonardo da Vinci 32, 20133 Milan.

How to contact the Registrar's Office

Chat – Chat service (access using your Online Services credentials).

E-mail – Access the Online Services on www.polimi.it/onlineservices with your person code and password, selecting "Questions? FAQ and contacts"

Fax – Send to the office and campus to which the question to be treated applies, attaching the copy of a personal identity document.

Desk – You can go to the desk of your pertinent Registrar’s Office, either personally or through others if they have a valid identity document and a signed delegation (indicating the exact nature of the information required) and a copy of a document of the delegating student/graduate student. Should there be no authentication, the Registrar’s Office can only issue general information.
