

POLITECNICO  
MILANO 1863

Dear Students and Colleagues,

today the first graduation exams in distance mode were regularly carried out in the Lecco Campus and tomorrow, March 5, we will hold the remaining sessions in the other Campuses of the Politecnico.

Today we want to confirm all the next dates scheduled for the graduation exams (Laurea Magistrale), which may be held in distance mode if the emergency continues.

For this reason, all the Professors will continue to support the graduating students in order to ensure that this temporary inconvenience does not compromise the outcome of the thesis work and does not create any delay in the deadlines already set.

Today we have also defined that the extra curricular language courses already planned for the past weeks will officially start on March 16 in distance learning mode if the emergency continues.

I remind you the nine new Study Programmes starting tomorrow 5 March in distance learning mode:

- Ingegneria Civile e Ambientale (Laurea) Lecco
- Ingegneria Civile per la Mitigazione del Rischio (Laurea) Lecco
- Ingegneria Edile – Architettura (Laurea quinquennale a ciclo unico) Lecco
- Mechanical Engineering - Ingegneria Meccanica (MSc) Lecco
- Electronics Engineering - Ingegneria Elettronica (MSc) Milano
- Architettura - Ambiente Costruito - Interni - Architecture - Built Environment – Interiors (MSc) Milano
- Architettura - Architettura delle Costruzioni (MSc) Milano
- Urban Planning and Policy Design - Pianificazione Urbana e Politiche Territoriali (MSc) Milano
- Design & Engineering - Progetto e Ingegnerizzazione del Prodotto Industriale (MSc) Milano

A “virtual class” has been arranged for each course; students who have such course in the Study Plan can access these classes. The operating notes and the tutorial are available [on this page](#).

I would like to thank once again the Professors who with their commitment, overcoming the initial difficulties, are experimenting with new ways of delivering classes, the students who have accepted with enthusiasm the challenge, and all the staff who supported the startup, is monitoring the progress of the lessons and is continuing to ensure the opening of services and information desks.

Thank you for your attention

Best regards

Ferruccio Resta

Rector of the Politecnico di Milano
