

POLITECNICO
MILANO 1863

Dear Students and Colleagues,

This morning the Prime Minister issued the new Decree that regulates new restrictive provisions for the Lombardy Region. Public service is not suspended, but mobility is limited to proven work needs.

We need therefore to continue long-distance teaching as planned, use smart working whenever possible, avoid physical gatherings by favoring remote connection meetings and in any case reduce all travels, if not strictly necessary.

We confirm the long distance teaching activities as announced in the past days. Today the monitoring unit will be in contact with all the relevant public institutions for the necessary coordination and for the implementation of the guidelines.

Tomorrow the monitoring unit will evaluate all the measures that will be undertaken and will issue the implementation guidelines that will be in force until the end of March.

I can only imagine the feelings of fear and dismay you may have experienced this morning, but as small the contribution of Politecnico can be to your life and the life of our country, we will face this emergency together with responsibility.

With my most warm regards
Ferruccio Resta
Rector of the Politecnico di Milano
