Dear Students and Colleagues,

today the monitoring unit met to define the essential services to guarantee teaching in distance learning mode as already planned, according to the indications of DPCM March 8, 2020.

We have already shared with other Rectors of the territories involved some indications. I would like to underline that the University will promote responsible travel and a more careful occupation of work and study spaces, activating smart working whenever possible, compatibly with the service needs.

We confirm, in addition to the delivery of all Study Programmes of the second semester:

- Opening of research structures to allow thesis students to continue their work in view of the next graduations on April, whose schedule remains unchanged;
- Research activities that cannot be postponed;
- Curricular internships, preferably in distance mode as indicated in this webpage.
- provision of extra curricular language course in distance mode starting on March 16
- studios of Architecture and Design in distance mode starting on March 16

The Open Day will then be rescheduled on a date to be defined and the Engineering Test on line is suspended until March 14.

As a follow up to the received requests, we remind everybody that, since the start of the emergency, the monitoring unit has established a protocol, in case of infection, to identify those persons who had direct contacts and promptly report them to the competent health authorities.

For questions regarding management and organization of the activities, please write to monitoraggio@polimi.it

Thank you for your attention

Best regards
Ferruccio Resta
Rector of Politecnico di Milano
