Dear Students, Dear Colleagues,

today we received good news from our Phd School. On April 6, in fact, the rankings of the additional calls for the 35th cycle have been published and we are preparing to admit 50 new doctoral candidates, by carrying out all the necessary formalities remotely and offering for now a distance study path. We can observe that even in this difficult moment Politecnico remains attractive also on the highest educational path.

I would also like to point out the resources available on our MOOC portal POK - Polimi Open Knowledge, active since 2014 and on which just today we published the 60th MOOC: “Particle-Laden Flows: Theory and Engineering Applications”.

Let me mention in particular those courses that support the study and preparation to the exams, such as the MOOCs “Equazioni differenziali del secondo ordine” or “Laboratorio di Matematica per Architettura”, “Introduzione alla fisica sperimentale” or the series “Introduction to Management Engineering”, in addition to the materials published on the POK Youtube channel, which can also be used in support of distance learning.

For reports regarding the management and organization of activities please write to the following address: monitoraggio@polimi.it

Best regards

Ferruccio Resta
Rector of Politecnico di Milano
