Dear Students, Dear Colleagues,

we face two deadlines in the near future:

- the validation of the effectiveness of the Admission Tests in distance mode: we will be ready to confirm to you modalities and the calendar in the next days

- the management of the summer session of written exams if the emergency does not allow a complete return in presence

At the same time, however, we are planning to deal with what is called Phase 2. We are defining which activities may in part be activated from May (the date of course will be defined by the competent authorities). Yesterday in the Academic Senate we started to analyze the various processes and the possible modalities.

We agree that it will be a priority to start the research activities in presence and to ensure access to the laboratories.
For this purpose the monitoring unit has begun to evaluate the measures to be implemented to ensure protection, spacing and sanitization of spaces.

The General Director and I, together with the Directors of Division and the Head of the Prevention and Safety Unit will start a discussion with the Department Directors and Managers to share the guidelines to be implemented.

For reports regarding the management and organization of activities please write to the following address: monitoraggio@polimi.it

Best regards

Ferruccio Resta
Rector of Politecnico di Milano
