ENSA, Ecole Supérieure d'Architecture de Normandie, belongs to the network of twenty prestigious French schools of architecture under the supervision of the Ministry of Culture and Communication.

Its territorial insertion at local, regional and national level is probably at the origin of its very specific identity: a heritage city together with industrial and port wasteland sites that challenges contemporary big social and environmental questions.

Among them, the School investigates the evolution of the links between architectural design and energy, (new technologies, new perspectives in the approach to materials and built forms), industrial heritage and cultural acceptance and transdisciplinary questions between architectural design and artistic creations linked to changes in contemporary modes of perception and representation.

## Points of strength

The cultural life is very rich and it is a very alive students place: there is always something for everyone and it is an overall very enriching experience.

The School is very active in linking the academic programme with stakeholders aiming at training responsive professionals able to grasp the new challenges of the diversification of architectural professions.

## Erasmus Agreement: 2 positions

Progettazione dell'Architettura/Architectural Design

Architettura e Disegno Urbano/Architecture and Urban Design
