LA NOSTRA MISSIONE

Il sistema universitario riflette il contesto geopolitico. Da una parte, gli Stati Uniti vantano alcune tra le migliori università nei settori delle tecnologie e delle scienze della vita. Dall’altra, il Sud Est Asiatico mostra la crescita sensibile di alcune prestigiose realtà accademiche, quali Tokyo, Singapore, Hong Kong, Shanghai.

Nonostante le difficoltà registrate, l’Europa ha nel sistema universitario un punto di coesione e di condivisione di alcuni valori fondanti: la centralità della persona e il senso di unità sociale, l’apertura mentale e il rispetto reciproco, l’importanza della diversità e la capacità di analisi e di giudizio critico, i meriti del fare impresa e i traguardi dell’innovazione. Un sistema universitario che, tra i primi, ha dato risposte alle minacce aperte da una crisi globale, che ha attribuito un ruolo di primo piano alla scienza, ai valori della competenza e dell’impegno.

Da qui dobbiamo ripartire per difendere la nostra identità e ridefinire un ruolo attivo dell’Europa nell’ambito internazionale, costruendo un modello di strette alleanze tra università guida. Il Politecnico di Milano punta a questo modello per definire il proprio ruolo e far fronte alle grandi questioni con le quali si misurano i migliori atenei di tutto il mondo. Abbiamo così delineato con chiarezza la nostra missione del prossimo triennio, essere una

“European Leading University”, capace di guidare la ricerca e l’innovazione scientifica e tecnologica per contribuire a uno sviluppo sostenibile e inclusivo.
